

Milestone 1

Team Name	Wasted Potential (for now)
Members	Arman Aydemir, Austin Weingart, Jessica Sanborn, Joseph Wilson, Skylar Martin, Obaid Ebadi
Description	We are building a calendar application for students that will help students of all levels plan their homework and study times throughout a semester. This will help minimize procrastination and maximize academic success. It will not only record what is planned to be done, but also help students achieve the steps necessary to reach milestones for each project.
Vision Statement	A calendar built for students, by students.
Motivation	Current calendar applications do not have the features that allow students to manage their schedule to the extent that is needed. Our calendar intends to be interactive and modular, to not just record events, but to suggest times to do things like study for a midterm coming up, or start a homework do Friday. It will have the ability to manage and organize a busy students life and coursework built with their needs in mind.
Risks	Experience, knowledge, time management
Risk Mitigation Plan	Waterfall Subteam structure Shared Calendar
